you have to look at the programmers guid before you remove anything of the code. The CT~ command for example changes the control prefix. Search the internet or zebra.com site for "ZPL Programming guide".

Which should not be included in this ZPL Code?

I have a shared printer in a private network and I want to customize a separator page so that whenever one of my clients sends a page to my printer a separator page prints with his computer name in order to specify which computer sent this page.
